

To: Jensen SAS Computer Lab User

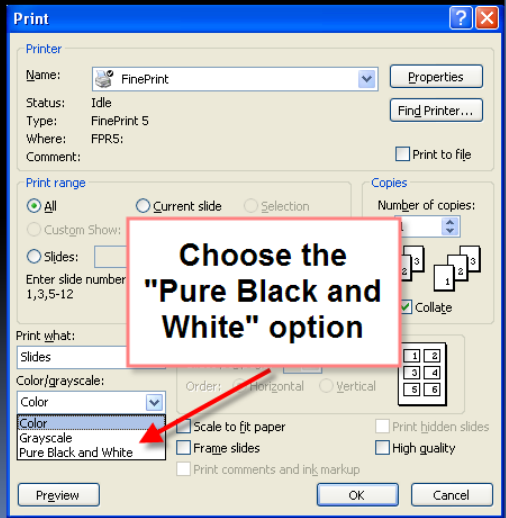

Here is an option to remove any background color and change the color text font to pure black for easier reading.

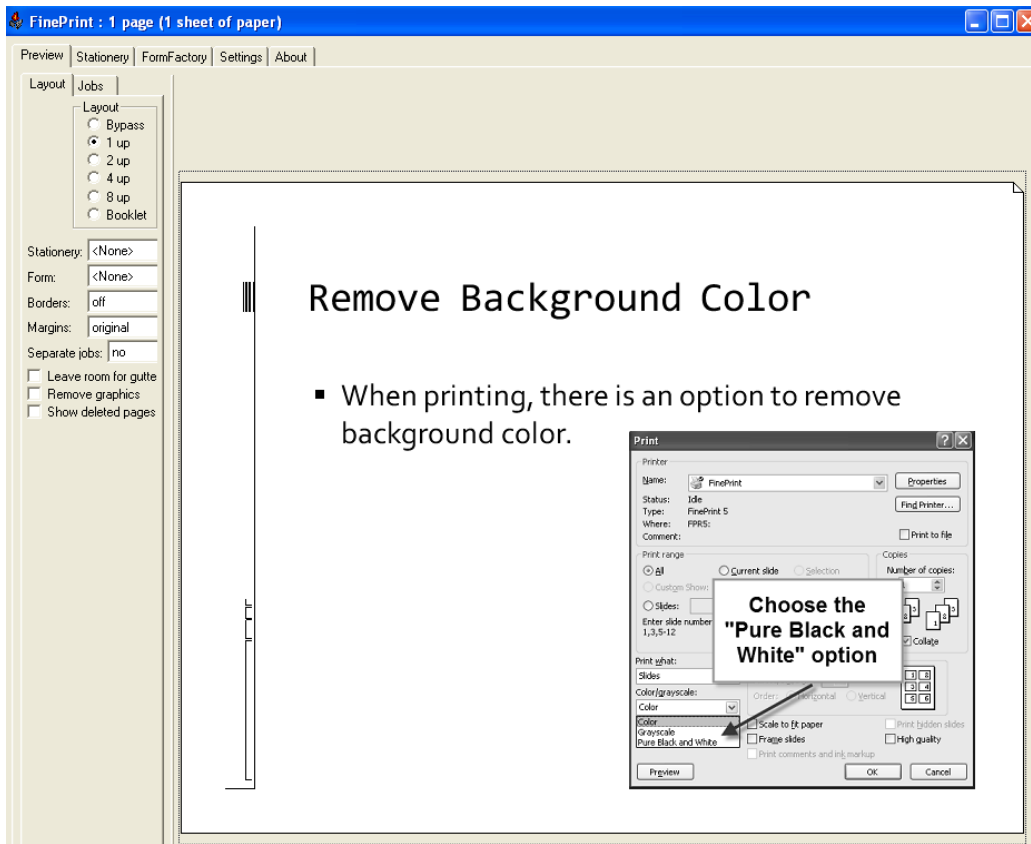

When you are at the print menu, look toward the bottom left hand corner. There is a drop down menu to select "Pure Black and White". Then, send your print to FinePrint to be able to print multiple pages onto a single sheet and double sided is another option.

If you don't have FinePrint, any printer will do.

Remove Background Color

- When printing, there is an option to remove background color.

Please let me know if there are questions.
